#### **ABSTRACT**

Ethiopia contains one-fourth of Africa's natural life and is involved earthly warm blooded creatures, birds, reptiles, types of creatures of land and water, freshwater fish, and more than arthropods with a high pace of endemism, yet It's Wildlife populaces and their administration are obliged by various components. Territory annihilation, fracture, poaching, and absence of clear public and global strategies, absence of responsibility from government authorities, shortage of assets, development of enormous scope agribusiness, illicit abuse of characteristic assets, and absence of gifted staff are the principle ones. Furthermore, Ethiopia's Ecotourism potential is tremendous and unrivaled yet the area is in its outset stage because of absences of successful and sound institutional system and legitimate bases for ecotourism advancement in identified with the less accentuation and acknowledgment given to ecotourism and furthermore absence of cohesiveness, honesty and collaboration among the partner. The greater part of the public stops and ensured spaces of the nation are feeling the squeeze from the encompassing networks looking for cultivable land, brushing area, or wood for various purposes. These workshop papers give a feature, not just on the issues of natural life the executives and ecotourism in Ethiopia, yet in addition the financial commitment and

Prospect; Wildlife; Ecotourism; Economic worth; Ethiopia

#### INTRODUCTION

Ethiopia, the Federal Democratic Republic of Ethiopia, is a nation arranged in the Horn of Africa that has been landlocked since the autonomy of its northern neighbor Eritrea in 1993. Aside from Eritrea toward the north, Ethiopia is lined by Sudan toward the west, Kenya toward the south, Djibouti toward the upper east, and Somalia toward the east. It is one of only a handful few nations on the planet that has a one of a kind and trademark fauna and greenery with a significant degree of endemic species (World Conservation . Ethiopia's current natural life expected comprises of earthly Mammals, more than 861 bird species, types of reptiles, types of creatures of land and water and Species of fish. Among these, well evolved creatures are accepted to be endemic and out of these are viewed as good country structures. Among birds, Ethiopia claims around endemic species, some of which are imparted to Eritrea.

#### **CONCLUSION**

He country has a wide assortment of natural life living spaces going from elevated field terrains to swamp savannahs with broad wetlands. He head monetary employments of untamed life are: the travel industry, shown in zoo, training of game species, safari/prize chasing, and game trimming. Then again Ethiopia's Ecotourism potential is enormous and unequaled however the area is in its outset stage. Ecotourism of the nation can be utilized as an approach to advance local area based characteristic assets the executives and occupation broadening. Regardless of these utilization, Ethiopia's untamed life and ecotourism potential are obliged by diferent factors. Powerless Policy, legitimate and administrative structure, Low degree of local area inclusion, Market entrance, Limited item advancement and enhancement, Limited financiaO motivating forces, Inadequate exploration and abilities base, Inadequate foundation stock and Environmental corruption are the significant limitations a jecting the ecotourism development. In

light of the above audit, the accompanying proposals were sent; expanding understanding the estimation of untamed life and natural life living spaces, and building up an effective and replicable untamed life instructive model. Institutional and strategy systems ought to must be set up and Policymakers ought to set up ecotourism observing and responsibility projects to guarantee that nearby networks get fitting measures of income. Ecotourism advancement ought to include the neighborhood networks in arranging, creating and dealing with the exercises. Ecotourism exercises ought not modify the conventional occupations of the neighborhood networks. Besides, the Communities ought to be given freedoms at all degrees of the board. Expanding the familiarity with nearby networks towards ecotourism or nature the travel industry is vital.
